

MINUTES OF THE NORTH CENTRAL AREA COMMITTEE MEETING

HELD ON MONDAY 11 MARCH 2024

1 Minutes of the meeting held on 19th February, 2024.

Order: Agreed.

2 Replies the Director of Services for the North Central Area

5 - 91

Order: Noted.

3 ENVIRONMENT AND TRANSPORTATION MATTERS

a Minutes of the TAG meeting dated 27th February, 2024 for noting.

Order: Noted.

b Gully report for noting

Order: Noted.

c Protected Cycle Lane on Grace Park Road for noting

Order: Noted.

4 PLANNING & DEVELOPMENT MATTERS

a Cara Park Additional Housing - Section 179a for noting

Order: Noted.

5 NORTH CENTRAL AREA MATTERS

a Discretionary Budget for noting

Order: Noted.

b Area Managers' Reports

Order: Noted.

c Housing Supply Report for noting

Order: Noted.

6 CULTURE, RECREATION AND ECONOMIC MATTERS

a Dublin City Council Sports Plan 2023 - 2028 - Teneo presentation to the North Central Area Committee

Order: Noted.

- b **Sports & Wellbeing Report for noting**
Order: Noted.

7 **MOTIONS**

- a **1. Motion in the name of Cllr. Jane Horgan- Jones (deferred from February)**

That this North Central Area Committee provide funding support for two schools (De La Salle, Kilbarrack and Manor House, Raheny) in the North Central area, to participate in the Yellow Flag programme in line with council policies on inclusion and diversity.

Reply

The Yellow Flag Pilot Programme & Research Report is supported by the E.U Directorate-General for Employment, Social Affairs and Equal Opportunities. Its funding is provided under the European Community Programme for Employment and Social Solidarity, PROGRESS (2007–2013). This programme was established to financially support the implementation of the objectives of the European Union in the employment and social affairs area.

There is no provision within the North Central Area budget to provide funding support for this initiative.

Contact: Mick Carroll, Local Area Manager for Clontarf – Donaghmede LEA
Phone: 222 8846
Email: mick.carroll@dublincity.ie

Order: Agreed.

- b **2. Motion in the name of Cllr. Damian O'Farrell (deferred from February)**

That this North Central Area Committee requests the area manager to organise the repair of a park wall which was clearly knocked over by a utility vehicle (bin) a couple of months ago. The wall is located at the smaller green in Griffith Court, Fairview D3 near the entrance to Fairview Community Unit. There is CCTV footage of a refuse vehicle clearly marked Panda obviously damaging the wall. The firm initially denied and had no report of the incident. I'm not sure what their position is now but the wall remains damaged. This Committee also instructs DCC to recover all costs from Panda Refuse. I have the footage available for further action.

Reply

If the date of the incident and the evidence is forwarded contact will be made with the company.

Contact: Fergus O'Carroll, Senior Executive Parks Superintendent

Tel: 222 6625
Email: parks@dublincity.ie

Order: Agreed.

c **3. Motion in the name of Cllr. Deirdre Heney**

That this North Central Area Committee calls on the manager to examine/identify/confirm the source of the very unpleasant smell recently at North Bull Wall coming from the direction of the Port and waste water treatment plant and the incinerator and explain the causes and the risks to human health, outline if same poses a risk to swimmers at North Bull Island and users of the island in general and say what steps are being taken to resolve the issue.

Reply

Air Quality Monitoring and Noise Control Unit

The Air Quality Monitoring and Noise Control Unit received complaints about a pungent odour described as chemical in nature from residents of the Clontarf, Killester and Ringsend areas week commencing 12/02/2024.

Inspections were carried out by officers of the Unit over a number of days at multiple locations. No pungent odour was witnessed.

Irish Water were contacted to determine if the smell may be related to Waste Water Treatment Plant.

They confirmed that works are ongoing on the upgrade of the secondary treatment tanks which involves cleaning some of the tanks.

They advised that this involved the process of removing the debris from the tanks which may create a certain amount of odour and that they are working to get this work done as soon as possible.

It is unclear if this was the cause of the odour and further inspections will be carried out. This includes arranging to walk the Port Area with Dublin Port Officials.

PWBO

The Protection of Waterbodies Office (PWBO) is responsible for the management of groundwater, surface water and the associated network. The origin of reported odours appears to be from EPA licenced facilities, with air being the receptor/pathway rather than water. Thus, risk to bather health is deemed low.

The EPA has a particular role in the assessment of nuisance odours from pertinent licenced sites. Complaints can be made to the EPA directly here.

Order: Agreed.

d **4. Motion in the name of Cllr. Naoise O'Muirí**

That this North Central Area Committee ask Public Lighting to undertake an assessment of lighting levels on Bettystown Avenue with a particular focus on the Howth Road end and implement measures to improve lighting quality where appropriate.

Reply

A lighting assessment has been carried out on Bettystown Avenue with focus on the Howth Road end and additional street lighting is required. Two additional lights will be installed on two ESB network poles in the coming months.

NORTH CENTRAL AREA COMMITTEE
11th March 2024

Q.2 Question in the name of Councillor Jane Horgan Jones

“To ask the Manager about an issue concerning the street lights on Stiles Court at **(details supplied)** which have several lights out, and residents believe an upgrade similar to the ones on Castle Grove would greatly benefit the community in terms of safety and aesthetics. Would it be possible to explore the possibility of upgrading the street lights on this road”

Reply

(Details supplied) have been repaired and should be operating normally now. In relation to upgrades similar to Castle Grove street lights in the Dublin City Council area will be upgraded to LED street lights under the Lighting Upgrade Project.

An exact timeframe for this upgrade work on Stiles Court cannot be provided at this stage except to say that the street lights will be upgraded over the next 5 years or so.

DUBLIN CITY COUNCIL
NORTH CENTRAL AREA COMMITTEE
11th March 2024

Q.7 Question in the name of Councillor Larry O'Toole

“To ask the Manager when will **(details supplied)** be considered for suitable accommodation.”

Reply

The above applicant is on the Housing List, with an application date of 06/06/2023, the applicant holds the following position on this list;

Area	Bedsize	Position
B	2	726
D	2	419
E	2	844

Dublin City Council allocates properties based on time on the list and currently there are applicants on the waiting list of longer standing who have to be considered as suitable vacancies arise. It is not possible to indicate accurately the prospect of an offer for any applicant. The number of vacancies arising will be a determining factor in the length of time applicants could expect to be on the waiting list.

I note from the applicant's file that she recently requested a HAP pack, which has been posted to her.

Dublin City Council are increasing the number of units that are being allocated through the Choice Based Letting Scheme, such vacancies are advertised on the DCC website. If there are no properties available at present, nothing will be advertised. Applicants can only apply for properties in their chosen areas that meet the size requirement of their household.

DUBLIN CITY COUNCIL
NORTH CENTRAL AREA COMMITTEE
11th March 2024

Q.9 Question in the name of Councillor Racheal Batten

“To ask the Manager to investigate if Lorcan Road (Santry side) sewage pipes are on the upgrade list”

Reply

Since 2014 the foul and combined sewers are now in the charge of Uisce Eireann. DCC is only responsible for the surface water drainage network since that date.

On 13th September 2023 Uisce Eireann (previously known as Irish Water) took over the direct control of all foul and combined sewage matters in accordance with the Government’s ‘*Framework for Future Delivery of Water Services*’.

DCC Drainage crews still working in the SLA now operate under the control and direction of Uisce Eireann Engineers and management.

Accordingly, questions/requests relating to foul sewerage should now be made directly to Uisce Eireann. Questions/requests relating to surface water drainage only should continue to be made to DCC.

Uisce Eireann provides a dedicated service for Local and Elected Representatives nationwide to ensure efficient and effective triage and resolution to any queries that they may have. Uisce Eireann’s Local Representative Support Desk (LRSD) is open Monday to Friday (excluding Bank Holidays), between the hours of 09:00 to 17:30. The LRSD can be contacted either by telephone (0818 178 178) or by email at localrepsupport@water.ie. Uisce Eireann’s LRSD team receive prioritised support from across the Uisce Eireann business and have direct relationships with the Regional Engineers so that information from the ground can be gathered and fed back where necessary.

Uisce Eireann Contact details for Oireachtas Members

- Dedicated Direct Line 0818 578 578
- Email: oireachtasmembers@water.ie
- Lines are open from 9am-5.30pm, Mon-Fri

Uisce Eireann Contact details for Councillors

- Dedicated Direct Line for Councillors 0818 178 178
- Email: localrepsupport@water.ie
- Lines are open from 9am-5.30pm, Mon-Fri

DCC are unaware of any issues with regard to the surface water sewerage on Lorcan Road and as such do not have any immediate plans for works on this part of the network. A CCTV survey will be undertaken to determine the condition of the surface water network and findings will be relayed to the councillor directly.

11th March 2024

Q.14 Question in the name of Councillor John Lyons

“To ask the Manager to outline the approach currently undertaken by the city council when dealing with privately-owned horses damaging public parks and pocket parks in the Darndale area.”

Reply

The powers of local authorities in relation to horses are as set out in the [Control of Horses Act 1996](#) and Dublin City Council and [Control of Horses Bye laws 2014](#) provide for the seizure and detention of any horse found to be in breach of sections 4 and 5 as set out below.

PUBLIC PLACE

4a. No person shall at any time have, keep, ride or drive a horse in a public place except in such portion thereof as may for the time being be set apart to be used as an equestrian ride or carriageway or market or fair area and is clearly identified as such.

4b. Notwithstanding the provisions of 4(a) a person may have a horse on a public road provided the horse is licensed under the provisions of the Act, is fitted with a bridle and is adequately controlled by a person over 16 years of age.

GRAZING IN A PUBLIC PLACE

5. No person shall at any time in a public place turn out to graze or feed or allow to stray or remain any horse without the written consent of Dublin City Council

AUTHORISED PERSON

11b. An authorised person or a member of the Garda Síochána may seize and detain any horse where he has reason to suspect that the horse is being kept, or ridden or driven in an area contrary to these Bye-Laws.

Dublin City Council Animal Welfare & Control Services respond to all reports of stray horses. An operation to seize the horses is planned once a full risk assessment has been completed by our contracted resources. This is normally done in association with An Garda Síochána. The Unit engage with local resources to provide intelligence of stray horse locations and movement. This information forms an essential component of the operational planning for any seizure. The majority of operations are carried overnight due to safety concerns for staff and on advice from AGS.

11th March 2024

Q.16 Question in the name of Councillor Patricia Roe

“To ask the Manager to report on recent changes to the right filter light at **(details supplied)** and the reason why these changes have been made”

Reply

The traffic signals at the junction of **(details supplied)** are controlled by Dublin City Council's urban traffic management system SCATS.

The SCATS system data indicates that this right turn filter signal to from Collins Ave Grace Park Rd is operating correctly.

A maintenance technician visited the site and confirmed that the vehicle detector for right turning vehicles is operating as specified and that the traffic signals are operating correctly.

The operation of the traffic signals at this location will continue to be monitored and changes made, as required, where there is scope to do so.

Contact: Seán Fallon, Executive ITS Officer, Transportation
Email: sean.fallon@dublincity.ie

DUBLIN CITY COUNCIL
NORTH CENTRAL AREA COMMITTEE
11th March 2024

Q.17 Question in the name of Councillor Patricia Roe

“To ask the Manager to arrange for consideration to be given to adjusting the traffic lights at the junction of Collins Ave/Malahide Rd on occasions when there is a match in Parnell Park as currently this junction gets completely bunged up and buses travelling east/west on Collins Ave are inordinately delayed, resulting in spectators being delayed in leaving the vicinity of a match”

Reply

The traffic signals at the junction of the Malahide Road and Collins Ave are controlled Dublin City Council's Urban Traffic Management System, SCATS.

SCATS is an adaptive traffic control system that alters signal timings based on traffic flows and traffic / pedestrian demands taken from vehicle detectors on approaches to junctions and pedestrian push buttons.

Dublin City Council operates traffic signal bus priority, via the SCATS system, that allocates extra traffic signal green time to approaching buses.

This bus priority system is in operation at the junction in question and caters for bus routes along the Malahide Road and also orbital routes on Collins Ave.

On match days at Parnell Park, traffic tends to be busy on all approaches and giving priority to one approach will only delay match day public transport and traffic on other approaches.

Therefore, a balance needs to be struck between different approaches and different modes of transportation.

The bus priority section are, however, reviewing the bus priority operation for match days with a view to improving traffic movements at the location for all road users.

DUBLIN CITY COUNCIL
NORTH CENTRAL AREA COMMITTEE
11th March 2024

Q.19 Question in the name of Councillor Patricia Roe

“To ask the Manager if the Council will consider crown topping or pruning the large trees beside a home **(details supplied)** due to their size and overhanging branches”

Reply

The reduction of the height of trees ‘Topping’ is an outdated practice which is no longer a recommended arboricultural technique. Topping or lopping, is bad for the health of the tree, opening large wounds as potential sites of infection from decay causing organisms and leading to a flush of weakly attached re-growth that can easily become detached in high winds potentially rendering the tree unsafe. The avoidance of this harmful pruning practice was included as a policy objective in the Dublin City Tree Strategy adopted as policy in 2016. .

The tree overhanging the property at the gable end of this dwelling has been previously examined and is listed for removal as part of the prioritised tree care programme for area 2024.

Q.30 Question in the name of Councillor Alison Gilliland

“To ask the Manager to provide a full explanation regarding the removal of the trees on Skelly’s Lane including outlining why was damage not anticipated during the ducting works and steps not taken to avoid such damage? How the damage done was assessed? The criteria considered to inform the decision to cut down the row of 26 trees? The likelihood of the trees falling during storm conditions should they be left in place?”

Reply

The Parks Service was not made aware of these proposed works and had no input into the methodology used. The damage was assessed visually where it was evident that a trench had been dug through the rooting zone without any form of mitigation or root protection. The relationship between root damage and tree stability has been extensively researched and is well understood by tree care professionals. Many standards, guidelines and recommendations have been published on this topic by professional arboriculturist and indeed utility bodies. The trench in this case was within 1m of the trunks of these trees an area defined in the National Joint Utilities Group recommendations 2007 as the ‘prohibited zone’ where mechanical excavation should not take place. Where installation of services in this zone is unavoidable many mitigation technologies exist where roots can be protected such as hand digging, air-spading or boring. An open trench was observed on site from one side of the canopies to the other without any form of root protection severing approximately 45% of the entire root architecture of each tree and all anchorage on one side of the tree line. It is a generally accepted principle that damage to 25% of the tree roots of a tree is significant enough to result in tree death. This level of root damage in this case is of enormous concern rendering the trees unstable greatly increasing the likelihood of failure during wind events. It is unfortunate that due to the level of damaged here in a high traffic area that removal of the compromised trees was the only viable solution to ensure the safety of the public.

Q.31 Question in the name of Councillor Alison Gilliland

“To ask the Manager to provide a full explanation regarding the removal of the shrubbery at **(details supplied)**”

Reply

The Development Department has received numerous complaints from both residents and Local Representatives about **(details supplied)** concerning anti-social behaviour, dumping and rodents.

Over the last few years, contractors have cleared the rubbish from the site costing about €5,000 per removal. Most of the rubbish was dumped in and behind the vegetation and this was adding to the rodent problem.

It was decided to cut the vegetation with the hope of alleviating these problems. The roots of the vegetation are still in place and are expected to grow again. The site is earmarked for development but we do not have a timeframe at the moment.

Q.32 Question in the name of Councillor Alison Gilliland

“To ask the Manager to arrange for the remarking and extensions of the following yellow lines at **(details supplied)**”

Reply

1. There is a solid white line along the end of **(details 1)** (at the junction with **(details)** Road) for a distance of approximately 20 metres where it is illegal to park. The requested 3.5m is already covered by the continuous white lane. Double yellow lines are not recommended to be extended.
2. The double yellow lines on **(details)** Road at the junction with Newbrook Road (west side of the junction, northern side of the road) are provided for a distance of 18 metres. This is considered to be an adequate length allowing for visibility at and around the junction. On-street parking acts as a form of traffic calming and the unnecessary removal of parking could serve to increase speeds in this residential area.
3. Any necessary roadmaking reinstatement/repainting at the location referenced will be referred to the Traffic Officer’s team for inclusion on their Works List.

Q.35 Question in the name of Councillor Deirdre Heney

“To ask the Manager in relation to location as per **(details supplied A)**, if he can agree to make advise when agreed Area Traffic Calming scheme will be put in place and in the meantime, can you advise what measures he can put in place at **(details supplied B)** to enable residents safely egress their home and if he will agree to the erection of a reflective mirror type bollard outside to the left of **(details supplied B)** that would indicate oncoming traffic to resident trying to egress from **(details supplied A)**”

Reply

Part A

A Neighbourhood Transport Scheme is currently ongoing in the Haverty Road/Marino Area and is expected to be completed in 2024. The **(details)** area is the next residential area on the list to receive a scheme. Following completion of the Marino scheme, we will liaise with the Area Office and commence developing a plan for the **(details)** area.

Contact: Andrew Geoghegan Neighbourhood Transport Engineer (North City)

Tel: 222 6347

Email: andrew.geoghegan@dublincity.ie

Part B

The visibility, when exiting the property, is obstructed by the existing property wall (pillar gate). In order to improve visibility, the height of the wall is recommended to be reduced or partially removed.

The Traffic Department does not provide convex traffic mirrors as they give a distorted view of approaching traffic which is hazardous. These types of mirrors attract a high degree of vandalism and they also have maintenance costs associated with them.

Q.36 Question in the name of Councillor Deirdre Heney

“To ask the Manager to please refer to the promise of internet access and the installation of a defibrillator in location as per **(details supplied)** and advise on how matters are progressing in the provision of both”

Reply

At a meeting with residents of **(details supplied)** on Monday 4th September, 2023, a number of requests were put forward to Dublin City Council for consideration which included but was not limited to “chair aerobics”, first aid training, internet access and the installation of a defibrillator. It was explained at that meeting & via subsequent emails sent to residents of **(details supplied)** that unfortunately, Dublin City Council is not in a position to accede to all of these requests.

Area Housing Management is cognisant that open internet access in senior citizen complexes results in antisocial behaviour, encouraging youths to congregate in the vicinity, which is undesirable & accordingly, is inappropriate. As each unit is self-contained, the procuring of personal internet access would be a matter for each individual resident themselves.

However, first aid training has been arranged with Dublin Fire Brigade by Area Housing Management in conjunction with the North Central Area Community team and dates will be finalised shortly. There is a defibrillator at **(details supplied)** parish hall, which is less than a minute away from **(details)** Court.

Q.37 Question in the name of Councillor Deirdre Heney

“To ask the Manager can the CE, in relation to bathroom floor of dwelling as per **(details supplied)**, say what progress is being made to resolve matters and can he also say if he will arrange to have moss/fungus removed from paving slabs in common area at **(details supplied)**”

Reply

Housing Maintenance have had a number of interactions with this tenant in relation to the bathroom. Although the tenant had installed his own bathroom, Housing Maintenance deviated from protocol and agreed to work with the tenant in relation to the issues he was experiencing due to poor workmanship. However, when the Depot called on 28th November last the tenant refused access and informed them that he was carrying out the works to the bathroom himself.

The slabs in the complex were also inspected by the Depot, who found them to be in good condition. However, they did request a power wash by the Caretaking Section on 20th February last in relation to the moss. The Caretaking Section will also arrange for the complex to be weeded and scutched.

Q.43 Question in the name of Councillor Deirdre Heney

“To ask the Manager in relation to application for Disabled Persons Grant from a person as per **(details supplied)**, please say when same will be granted.”

Reply

The Housing Grant Section administers three Housing Grants Schemes designed to provide assistance to people making adaptations to their privately owned homes to meet their medical needs and to older people in poor housing conditions carrying out essential repairs to their owner occupied homes. These measures enable people to stay in their own communities and prevent or delay their placement in residential care thereby reducing social segregation, assisting their carer’s and strengthening families.

The three Housing Grants are as follows: -

- 1) *Housing Adaptation Scheme.***
- 2) *Mobility Aids Scheme.***
- 3) *Housing Aid for Older People.***

The above referred to Application was received in the Home Grants Section on 21st February 2024. Due to the number of Housing Adaptation Grant applications we are receiving, currently approval of the Housing Adaptation Grants takes about 8 to 10 weeks.

However, the Applicant will have an initial inspection in the next 4 weeks, and if all relevant documentation is correct, approval will be issued in April 2024.

I have attached the hyperlink to Housing Adaptation Grants for People with a Disability.

Q.46 Question in the name of Councillor Jane Horgan Jones

“To ask the Manager to make a statement on the tree growth and kerb conditions at **(details supplied)**. The trees are a beautiful feature but they have gone through considerable growth. They are blocking out the natural daylight into the houses and extending into the gardens. They also block out the street lighting during the winter period. While I would not like to see the trees removed, I am requesting that they are cut back considerably before the Spring/Summer period. The kerb sections around the trees have all come away, they are a trip/accident hazard and the broken pieces opened to be used for vandalism. I have removed broken pieces myself just to make the immediate areas safe. No repairs have been carried on these kerb sections for years.”

Reply

The trees on this short section of road which includes this address were recently examined on foot of a similar request and were found to be in an acceptable condition with no works required or recommended at this time. **Objective 3.7.8 ‘Shading’** of the adopted tree policy states that ‘Tree Works will not normally be carried out to address shading of direct sunlight’. There are a small number of street lights on this section of road and none are being unduly obscured by the publicly owned street trees.

Q.57 Question in the name of Councillor Declan Flanagan

“To ask the Manager to respond to the following regarding grass verges at **(details supplied)** and if he will make a statement on the matter.”

Reply

The grass verge maintenance policy remains unchanged however in 2023 the Park Service collated a list of locations where grass verges were identified by residents and Councillors as being in need of maintenance and these were attended to in Q3 of 2023.

In 2024, funding of €600k has been allocated across the city to cut certain locations once a fortnight throughout the growing season identified with wider margins. These identified verges have been added to the landscape maintenance contract. In the North Central Area these include:

- Brookwood Avenue from Gracefield Road to Howth Rd R105 (North Central Area)
- Tonlegee Road From R109 Malahide Road to Raheny Road Junction (North Central Area)

While the evidence is that the majority of residents are maintaining their grass margins any further similar requests received to cut verges at locations where residents or communities feel there to be a need of support by the City Council will be considered on their own merits.

Q.58 Question in the name of Councillor Declan Flanagan

“To ask the Manager to respond to the following regarding weeding programme and if he will make a statement on the matter.

Reply

The weed removal programme for the North Central Area spend in 2024 is approximately €122,850 plus VAT. The areas that Public Domain will be covering are attached.

The mix of ingredient used to remove weeds are as follows:

- 1) Targeted treatment using *New Way Spray to deal with visible weed growth
- 2) A Target Spot Treatment using a Tank Mix of Chikara & Katoun Gold
- 3) A Target Spot Treatment using Garlon Ultra

The environmental benefits of using these alternative methods include:

- They are ALL glyphosate free
- They are effective and high quality
- The application method produces significantly lower carbon emission compared to that of other methods (flame/ hot foam)
- *New Way Spray Contains 240g/L Acetic Acid - naturally occurring and bio-degradable
- Safe for the environment - breaks down naturally in water

Reply

Currently we have 36 staff operating in North Central Area, these are supervised by 3 supervisors and 1 inspector. There are 13 side loaders, 3 large road sweepers, 1 compact sweeper, 1 cycle lane sweeper, 1 tail-lift truck for illegal dumping and 1 grab truck shared with the other north side areas.

It is hoped to have an extra compact sweeper when we take full delivery of the new fleet as well as more staff, numbers depending on candidates being successful in the current competition.

Q.61 Question in the name of Councillor Declan Flanagan

“To ask the Manager to respond to the following regarding waste bins at **(details supplied)** and if he will make a statement on the matter.”

Reply

The number of bins in the North Central Area at the start of 2023 was 726 and there were 730 bins there at the end of 2023. Requests for new bins are considered on a case by case basis. There are plans in place to install a litter bin at the bus stop opposite Grattan Wood.

Q.64 Question in the name of Councillor Alison Gilliland

“To ask the Manager to arrange for the pruning of the trees along roadway into Beaumont Woods along The Park and also for the green area to be tidied up - some more elderly residents indicate that the green area is difficult to walk across without tripping.”

Reply

The trees will be examined in the coming weeks as local schedules allow and any works deemed necessary will be listed for inclusion in the prioritised tree care programme for the area 2024-25.

The green area will be inspected for trip hazards.

Q.65 Question in the name of Councillor Naoise O’Muirí

“To ask the Manager to please provide an update on (1) tactical measures being implemented on Clontarf Golf Course to minimise risk of reoccurrence of the recent flooding event at Castle Court & Auburn and (2) progress towards implementation of the final stage of the Wad flood alleviation scheme from the Howth Road to the seafront”

Reply

- (1) Alterations to flood controls in Clontarf Golf Club are estimated to reduce the flood risk to Castle Court and Auburn Apartments. Despite some heavy rainfall events including the recent snow event on 1st March last there has been no excess flows into the flood retention pond in the Golf Club since August 2023. Increased monitoring and alarm regimes are also now in place.
- (2) Contract documents are being completed for the new tunnel under the Howth Road (with private landowners on board with proposals) as well as the new Wad outlet details on the promenade. These are both programmed for delivery later this year.

Q.69 Question in the name of Councillor Naoise O’Muirí

“To ask the Manager to provide a report on the trees in charge of Dublin City Council in the open space at St David’s Wood including:

1. Confirmation of the species involved – I’m told that they are Ailanthus Altissima
2. If this tree is considered an invasive species
3. Summary of representations received from local residents in relation to these trees over the last 5 years
4. Advice for local residents in managing the impact of these trees on both the public domain and on their own hedges and gardens.”

Reply

1. The species is Ailanthus altissima or ‘Tree of Heaven’.
2. This is not listed in the third schedule as are Japanese Knotweed or Giant Hogweed but is considered a species of concern under the EU Regulations of Invasive Alien Species, it cannot be imported, traded, or released to the wild. Measures must also be taken to prevent spread of existing populations.
3. Contacts have been received from the adjoining resident regarding suckers appearing in the private hedge beside the open space.
4. The tree does sucker vigorously which are controlled by mowing in grassed areas and should be cut at the base within private hedges. The species is very sensitive to shade so is not as vigorous in shadier locations.

Q.71 Question in the name of Councillor Naoise O’Muirí

“To ask the Manager for the C2CC project team to provide a response on getting Malahide Road pedestrians safely to the new bus stop at the Fairview end as highlighted in the correspondence below at **(details supplied)**”

Reply

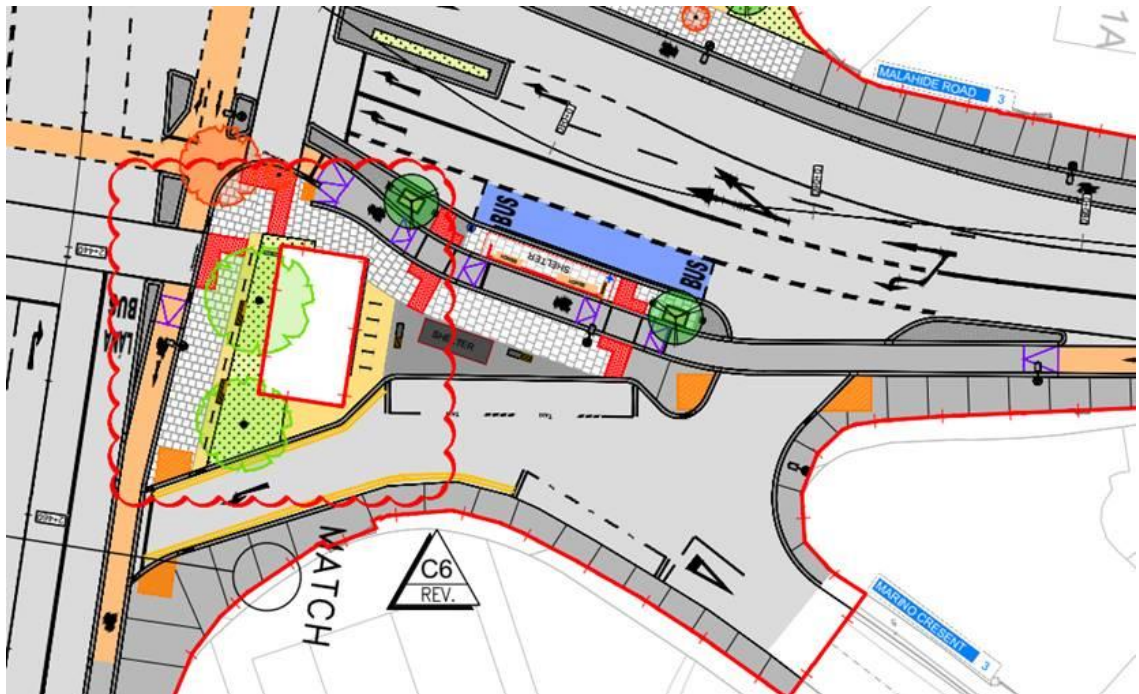

The Clontarf to City Centre Scheme continues to review the crossing points at the bottom of Malahide Road and the junctions with Marino Crescent and Clontarf Road. The crossing proposals need to take account of a number of elements when considering how these locations are to be managed. The route from Malahide Road and the left turn onto the slip lane to Marino Crescent and to Clontarf Road is (i) a HGV route (ii) an abnormal loads route and (iii) potentially a bus route in the future. Please see sketch below which identifies the 3no.crossing locations at Malahide Road/Marino Crescent and Clontarf Road. Please also see below for relevant bullet points to try summarise the current proposals for each of the 3no. crossing locations;

1. Crossing no. 1 – Malahide Road onto slip road at Marino Crescent Crossing;
 - Current design proposal indicates an uncontrolled pedestrian crossing
 - It is not believed that this crossing point is suitable for any form of controlled crossing due to the HGV and bus movements expected from Malahide Road and onto Marino Crescent and the proximity of the Malahide and Clontarf Road junction. The proposed design layout is essentially the same as existed previously with the bus stop also in the same location as was the case previously.
 - A raised kerb on each side of the cycle-track coming down Malahide Road is to be constructed with the intention of slowing traffic which intends to make the left-turn onto the slip road.
 - At present no changes to the proposed layout are planned for this crossing

2. Crossing no. 2 – Marino Crescent;
 - Further to a design review if it is possible for a raised table to be installed at this location (similar to other side roads on the Scheme) this shall be undertaken

3. Crossing no. 3 – Marino Crescent/Clontarf Road;
 - Current design proposal has provided for an uncontrolled pedestrian crossing
 - It is noted that this crossing point facilitates abnormal loads travelling in both directions (escorted loads).
 - A raised kerb on the Clontarf Road outbound cycle-track is to be constructed which is intended to slow traffic making the left-turn from the slip-road.
 - A further design review shall be undertaken at this crossing point to see if there is any form of controlled crossing which can be incorporated at this location. The Project Team can report once this review has been undertaken.

In summary, we shall endeavour to provide a raised table at Crossing no. 2 as we have at other side roads along the Scheme (identified as per below at Marino Crescent) and conduct a further design review of Crossing no. 3. With regard to Crossing no. 1 it is for now intended to leave the arrangement as per the current design which is similar to what existed previously prior to the Scheme being undertaken (a raised kerb shall be in place on the cycle-track at crossing no. 1).

Q.73 Question in the name of Councillor Naoise O’Muirí

“To ask the Manager seek a detailed response from the C2CC Project Team in relation to current congestion levels at peak on the Clontarf Road/Alfie Byrne Rd as set out in the correspondence below (**details supplied**) response to include (a) assessment of cause of current congestion (b) potential tactical measures for alleviation and (c) estimated date of completion of works on Alfie Byrne/East Wall Rd and restoration of traffic lanes

Reply

Clontarf to City Centre Scheme

The C2CC Project is a major infrastructure project, which is delivering significant civic improvement works to the Fairview, North Strand and Amiens Street areas with the provision of new water mains, upgraded and segregated junctions, new roads, footpaths, cycling and bus infrastructure. We are extremely grateful to the local communities all along the route and commuters passing through our works area for their patience and cooperation whilst the works are ongoing.

The design of the Clontarf Road / Alfie Byrne Road junction is intended to provide shorter and safer crossing options for pedestrians and cyclists alike. Whilst the Scheme remains under construction the inbound traffic diversion from Fairview Strand onto Ballybough remains in place. Due to this diversion it is believed that additional traffic is likely trying to avoid this route and is travelling to town via Alfie Byrne Road and East Wall Road instead. As the C2CC scheme progresses towards Practical Completion around the end of Q2 2024 the diversion shall be lifted and inbound traffic shall be able to progress via North Strand Road as before. Once the diversion is lifted this is expected to take some traffic back off of Alfie Byrne Road.

The East Coast Trail Phase 1 Scheme

The East Coast Trail Phase 1 Scheme, including Alfie Byrne Road & East Wall Road Cycle-ways, will be completed by May 2024 along with the full commissioning of the final configurations of Traffic Lanes.

As part of the Scheme eastbound road space has been re-assigned with a two-way cycle-lane being installed.

The various works (surfacing and line marking) on Alfie Byrne / East Wall Road junction and at Church Road and East Road junctions are nearing completion. DCC Traffic continue to review the optimisation of sequencing at these junctions to try mitigate against delays on a temporary and permanent basis. This work remains ongoing. Through any additional optimisation and completed works and markings it is hoped that flows from Clontarf Road to Alfie Byrne and along East Wall can be improved. It is noted however that a portion of the space which existed previously on East Wall Road has now been re-assigned to the cycle-lanes.

“To ask the Manager to respond to the following regarding traffic lights at **(details supplied)** and if he will make a statement on the matter”

Reply

Dublin City Council Road Construction are currently prioritising opening Belmayne Main Street from Churchwell Crescent (western end) to New Priory (eastern end), area highlighted in green and orange on the attached map. This work includes switching on the traffic lights at the junction of Belmayne Main Street/Belmayne Avenue and commissioning of the public lighting infrastructure along Belmayne Main Street. Road Construction are closely coordinating the opening of this section of carriageway with the new Educate Together Secondary School (OHLA/KSNPM) and Cairn Homes Parkside 5B Development.

The pedestrian traffic lights at the junction of Belmayne Avenue and Parkside Boulevard will be reviewed following on from this.
