Re Implementation of Planting Plan in Ranelagh Gardens Park

As part of the programme of works which was included in the Part 8 landscape enhancement works for Ranelagh Gardens Park it is proposed to implement the following over the coming weeks:

- A planting programme which will enhance the park and improve the range of habitats and biodiversity.
- Works will include planting to improve the entrance from Ranelagh Road, create a bird friendly zone, new island and pond planting, replacement tree planting.

The works being proposed were inspired by the collaboration with local schools during the consultation process prior to the Part 8. See attached report for more detail.

It is anticipated that the works will commence over the coming weeks and the planting is designed to provide peak interest and colour over the late spring and summer months.

Michael Noonan
Senior Executive Park Superintendent
