**Tallaght to Inchicore 110kV cable project**

---

Please find attached an information booklet in respect of a project which been designed to support current power demand and future growth in the Tallaght Industrial Zone. This will involve ESB Networks bringing two new underground 110kv cables from the nearest 220kv Sub-station in Inchicore to the new ESB Networks 110kv Airton Sub-station. The route passes through both SDCC and DCC.

New Century Engineering Ltd (NCE), a specialist utilities contractor, has been engaged to carry out the construction of the new network and also to facilitate the installation of the cable. Businesses and residents along the route will be receiving letters specific to their area from New Century Engineering detailing the exact works and timeline in their area two weeks ahead of that work starting, with contact details for contractors on the ground provided. It is anticipated that the project timetable will begin in South Dublin County Council crossing into Dublin City Council in Quarter 1 of 2018.
