5th March 2018

**To the Chairperson and Members of
The Central Area Committee.**

GDA Report – March Area Committee

The HSE Primary Care Centre will form the core of the HSE area on the Grangegorman site. The development consists of part new build and part refurbishment of the protected Laundry building. The facility will accommodate the Grangegorman and Cabra East primary care teams along with a range of other health and social care network services for the North West Inner City. There will be GP suites and public nursing, facilities for ophthalmology and occupational therapy as well as a full audiology suite, including the bone anchoring hearing aid (BAHA) programme and hearing aid repairs.

The HSE Primary Care Centre opened in late 2017 with staff from audiology moving in and commencing their service. The ophthalmology & child and adolescent mental health services will be moving in April. The GP's service is due to move in early May which likely coincides with the relocation of the Thompson Centre (Mountjoy Street).
