1	7000683		Stop Sign	TURVEY AVENUE (SC)	Dublin 8	Stop Sign	on Turvey Avenue at the junction of Emmet Road.	Member of the Public	30/11/2017	Recommended	Following investigation, it is recommended that a yield sign would be sufficient at this junction as there is good visibility. Therefore it is recommended that a Yield sign RUS026 accompanied by a Yield Line RRM 018 be provided at the junction of Turvey Avenue and Emmet Road in order to alleviate confusion over junction priority.	0	
2	7001086		Parking Bays	NEW IRELAND ROAD (SC)	Dublin 8	P&D/Permit Parking	Introduction of a Scheme.	Councillor	05/01/2018	Not Recommended	It was not recommended to introduce a pay and display scheme on New Ireland Road. A lot of the houses on this street have widened their front gates without planning permission which means that they are now aligned to the house across the street. This makes introducing a scheme extremely difficult as most locations would not be suitable now.	0

Member of the Public	09/01/2018	Recommended	It is recommended two road markings M 108 be installed with 30km within a circle. The first should be installed to compliment the 30km slow zone sign on Herberton Road as you travel inbound (North) from Dolphin Road. The other should be installed on Herberton Road as you come off the roundabout heading outbound (south) from the South Circular Road.	0	

5	7001544		Stop Sign	BALFE ROAD EAST (SC)	Dublin 12	Stop Sign	replace yield sign with stop sign at junction with Lisle Road	Member of the Public	02/02/2018	Not Recommended	Following a site inspection of the junction of Balfe Road and Lisle Road the Engineer would not be in favour of changing the Yield sign to a Stop sign as visibility is very good at this junction. A Yield sign would be favoured in this case as Stop signs are normally used at priority intersections where a road joins a national road. However, on other roads Yield signs RUS 026 should be used where visibility is	0

Member of the Public	17/10/2017	Not Recommended	Following a site inspection, speed ramps would not be recommended on Clifden Drive as it's a cul-de-sac and has very low traffic volume counts. During the site inspection the Area Engineer observed that the number of vehicles using Clifden Drive fell far below the required number of 60 vehicles an hour.	0
