11067135	Q74 NCAC 16/7/18	"	"Regarding the lower end of Griffith Avenue and the wooden borders there Residents have requested their removal as they are unsightly and also a danger to school children and the elderly. Children have tripped over them and in some cases have cut themselves on the wood and steel that support these borders.Motorists are of the opinion that these wooden borders were put in to aid car parking. They feel the border provides their cars with protection. As a result cars are now parking on the grass verges more regularly and for longer periods.They have become damaged over the years with cars constantly driving into them. Griffith Avenue is a beautiful avenue and these wooden borders are giving it a dreadful look.It might be an idea to raise the path at the edge of the grass verges to prevent cars driving from the road onto these same grass areas. This has been done in the I.F.S.C. to great effect. This type of solution would be cost effective in the long term and also more aesthetically acceptable.	26/07/2018 11:54	Reply sent Enquiry Resolved
