1. Family Homelessness

In Dublin at the end of May 2022, there were **972** families in emergency accommodation. 972 represents an increase of **16** on the April 2022 number, and an increase of **284** when compared with May 2021 when there were **688** families in emergency accommodation.

The number of children residing in emergency accommodation at the end of May was **2,259**. This is an increase of **50** when compared to the April 2022 figure and **600** more than the May 2021 figure of **1,659**.

1.1. Use of Commercial Hotels:

There has been an increase in the numbers of families using commercial hotels. By the end of May 2022, there were **177** families residing in commercial hotels. This compares with **90** in May 2021, an increase of **87** families. The highest level was in March 2017, when the number of families in commercial hotels reached **871**.

Non-contract accommodation (previously known as self-accommodation) is now booked via DRHE. We are working with the other Local Authorities to develop alternatives to hotels with exits to housing the preferred option, followed by NGO-run Supported Temporary Emergency accommodation and contracted accommodation, where there are no available housing options.

There is still space for smaller families in supported accommodation but we are often reliant on commercial accommodation for larger family sizes or in locations where there are no/limited alternatives.

The percentage of families in the 0-6 and 6-12 month and 18-24 month categories has increased compared with the same month last year, while the percentage of families in the 12 months+ categories has decreased, reflecting an effort to target families experiencing long term homelessness.
