

To the Chairperson and Members of
The North Central Area Committee

Meeting: 21/11/2022

Update report on illegal dumping at Newtown Industrial Estate

The CCTV cameras are still in place at Newtown Industrial Estate and the site continues to be monitored. 17 fines have been issued in relation to this site which were for small items illegally dumped. As the larger incidents of illegal dumping were not being captured on CCTV, the position of the cameras were changed. On the night of 04/11/2022 @ 19.22, the CCTV camera captured footage of a white tipper truck being driven into the site. The passenger got out of the truck and went around to the back of the truck. The truck tipped a load of waste materials onto the ground. The passenger lifted one item from the waste on the ground and put in back in the truck. The passenger got back into the truck and it was driven away.

Details of the registered owner of the truck have been sought from the Motor Tax Office and a direct prosecution will be sought.

The CCTV cameras will remain in place until the illegal dumping at this site ceases.
