**Re: Proposed Mural on the block wall adjacent to the 'Hive' in Herbert Park**

---

I wish to advise the members that it is proposed to use the block wall, adjacent to the 'Hive' and facing the children's playground in Herbert Park, to create a mural.

The mural will have a biodiversity theme with plants and animals displayed and it is hoped that it will help animate this area of the park and promote the 'Hive' and also the rich biodiversity within the park.

Preparatory work on the wall will commence shortly and the mural itself will be applied by the end of October. The application of the paintwork is weather dependent so this timeline may vary depending on weather conditions over the period.

I have attached a before and after picture of the wall for your information.
