## **Report to the Finance Strategic Policy Committee Water and Drainage Related Assets of Dublin City Council**

Under Section 12 of the Water Services (No.2) Act 2013, the Minister may transfer property of a Water Services Authority (in this case Dublin City Council) to the ownership of Irish Water by Ministerial Order.

Prior to such an order, the Local Authority must have the property registered through the Property Registration Authority of Ireland (PRAI).

The DCC Service Level Agreement Management Unit is working through the 92 properties related to Water Services at present.

To date, all underground assets (pipelines and ancillary assets as well as 13 specific underground assets) have transferred to Irish Water in 2014 through a general Ministerial Order as well as a total of 9 further over ground assets as listed in the attached which have subsequently transferred through a series of Ministerial Orders. These include Ballymore Eustace Water Treatment Plant, Ringsend Wastewater Treatment Plant and the Stillorgan Reservoir site. Properties such as depots and offices will not transfer to Irish Water.

This includes the following:

- 92 water services assets;
- Assets that have transferred to Irish Water to date
- Dwelling houses that are situated on certain water services assets.

I trust this report satisfies the requirement of the SPC.
