

BLEEPER*bike*

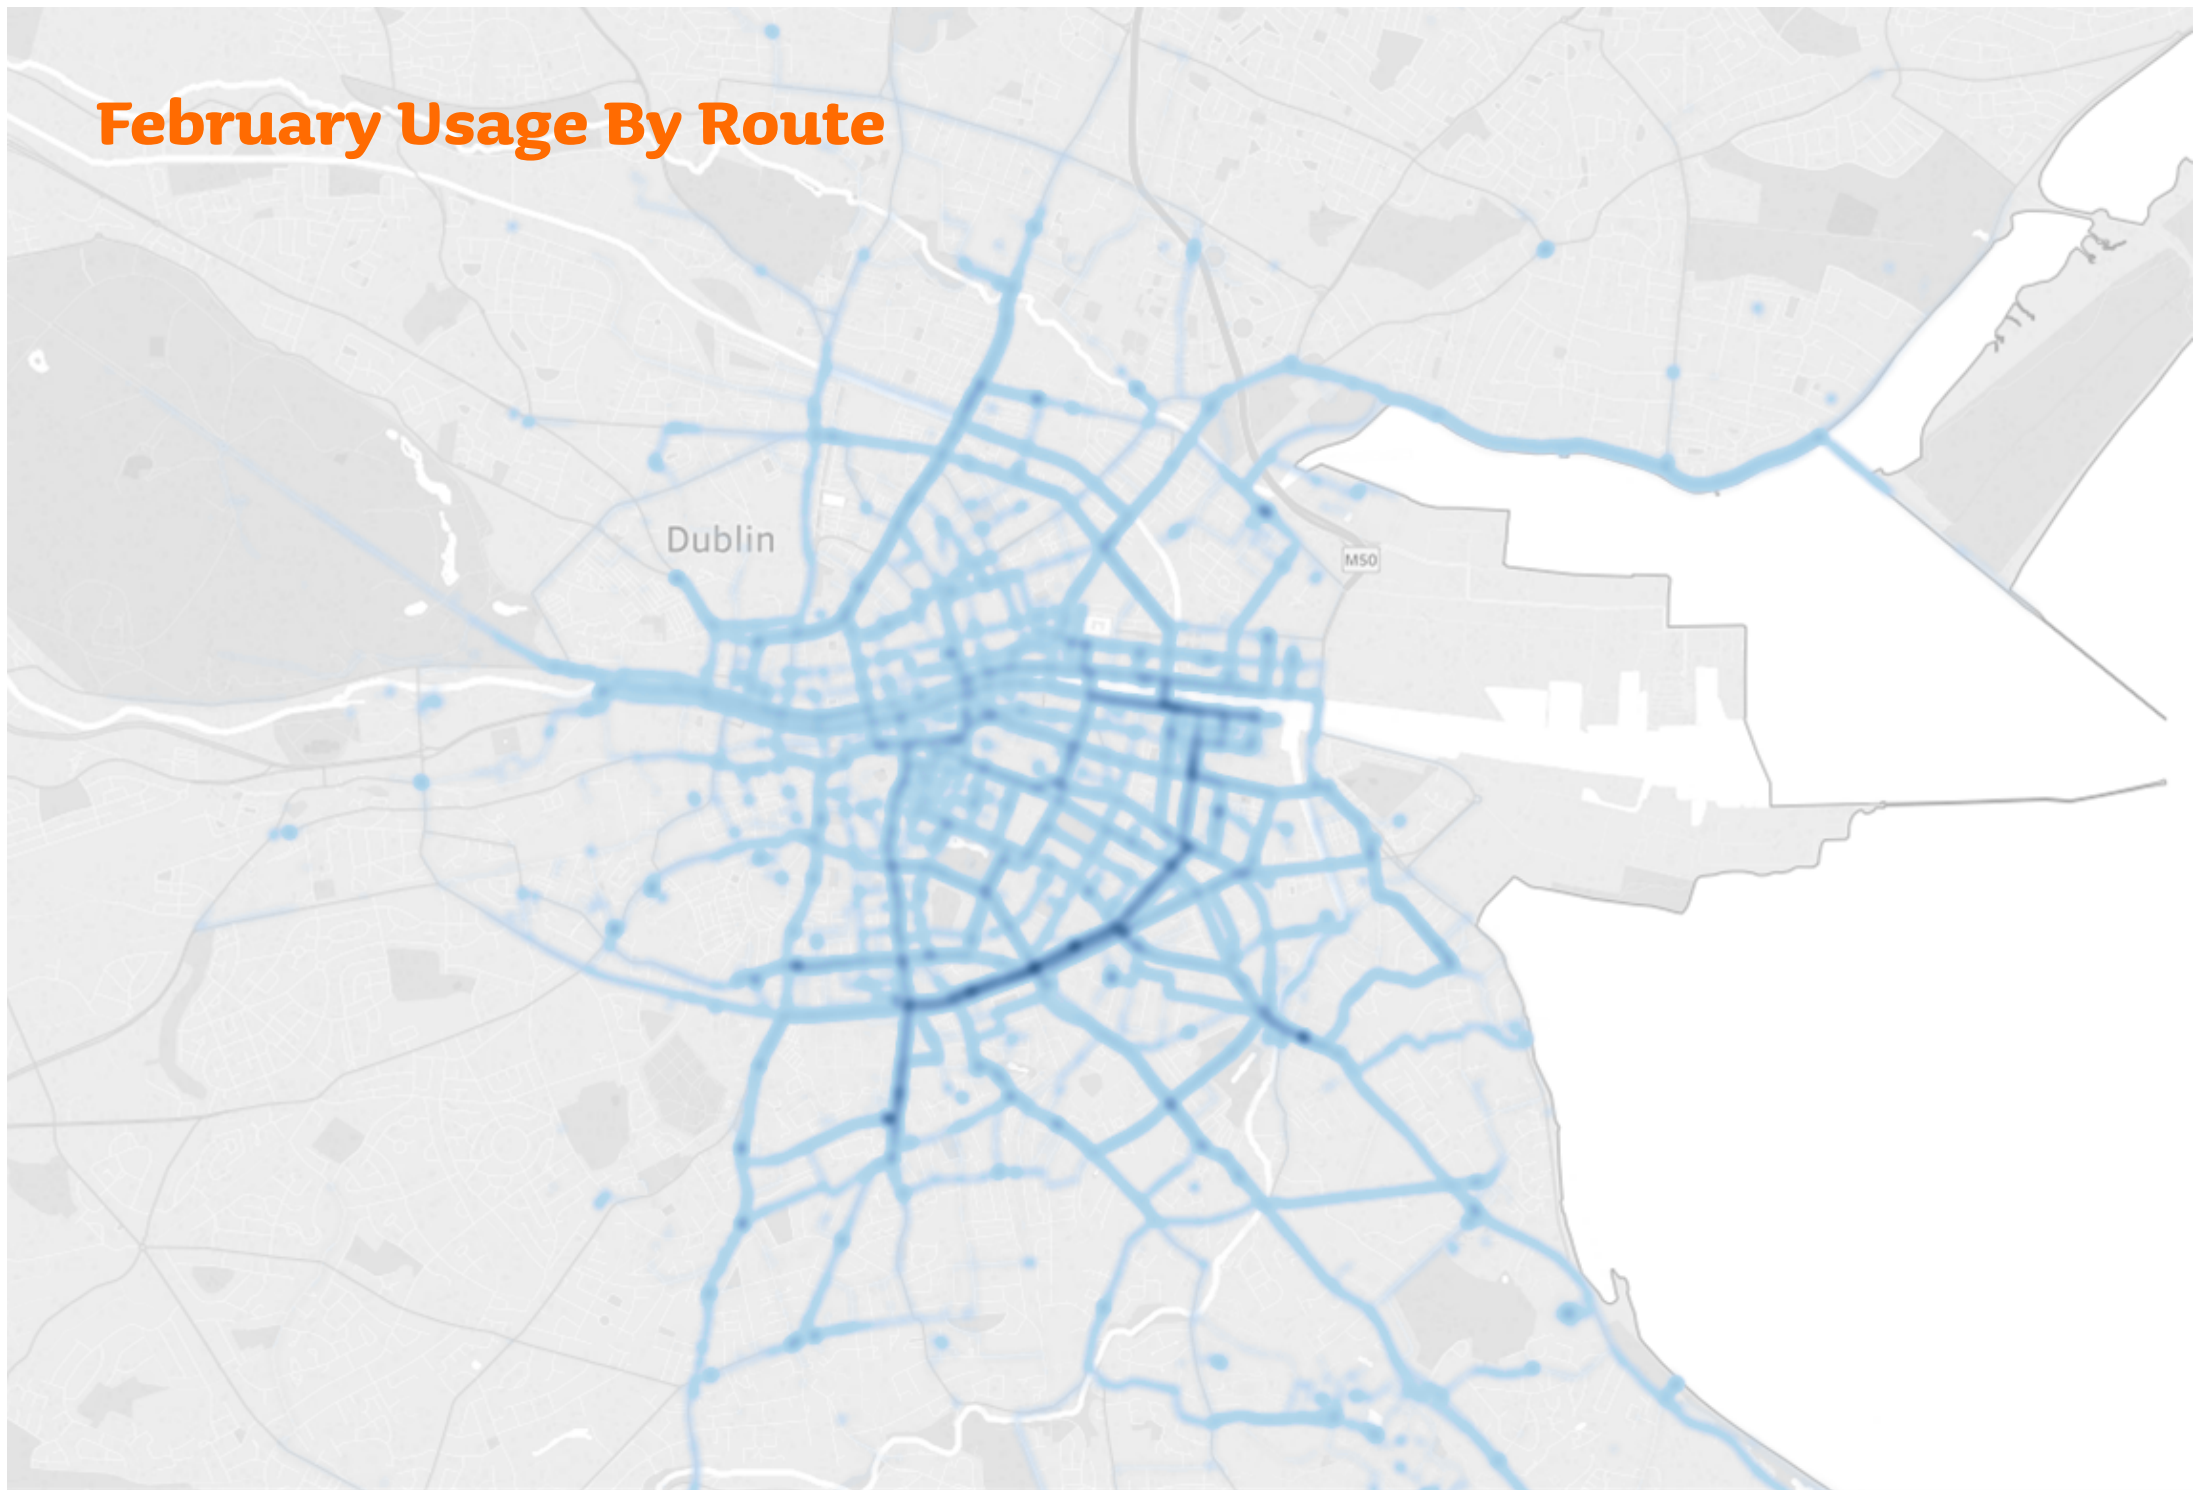

Comhairle Cathrach
Bhaile Átha Cliath
Dublin City Council

Sheet 1 (2)

February Usage By Route

BLEEPER-E

The BLEEPER-E will have a 200km battery, we have also taken a number of learnings for BLEEPER V1 to improve on - the lock, basket and wheels

OUR FEEDBACK

1. **The long-term viability of privately funded bike hire schemes is based on daily utilisation of the bikes, with 2 rides per bike per day being the minimum to be economically viable;**
2. **The partnership approach with both DCC and the public is proving successful, members of the public regularly call us to report bikes causing a hazard and bikes that have been vandalised;**
3. **Ebikes are already proving very popular with commuters as they take the effort out of the cycle which is often a significant barrier when dressed in work clothes (New York Ebikes x3 standard bikes)**

**Yours Sincerely,
BLEEPER*bike***
