Sandymount Green Area Covid 19 Social Distancing Related Interventions

Dublin City Council has established a working group tasked with the investigation of the Sandymount Green area with regard to Covid-19 and Social Distancing Interventions.

An engineer has assessed the area and potential concept designs are being investigated. As part of this investigation, engagement has commenced with Dublin Bus, Go Ahead Bus and an initial consultation will begin with business owners in the coming days. Following this initial round of consultation, we will discuss our findings with the councillors.
