To the Chairperson and Members
of the South East Area Committee

**Re: Proposed Street Tree Maintenance Programme for 2021 and Tree
Planting undertaken for 2021 in the South East Area**

Street trees located on the following roads and parks in the South East Area will be prioritised for work in 2021. Works will primarily involve tree pruning but may require additional work based on the condition assessment undertaken by the tree surgeon.

The exact numbers of trees to be pruned will be determined by the value of competitive quotations received by competent tree surgeons.

33	Brickfield Park	Various	71	Removal due to variety of issues (41 removed winter 20/21, 30 to be removed in autumn/winter 21/22). 70 replacements will be planted.

Approximately 86 No. trees were felled and removed during 2020/21 in the South East Area. This was primarily due to disease, old age in the case of mature tree stock and vandalism/drought in the case of younger trees.

In excess of 216 No. trees were planted as replacements and as new planting along roadsides, in public parks and open spaces as succession planting so as we ensure that the city tree canopy is maintained for future generations.
