5. Cocowave Pendulum Swing
6. Track Ride with Tower
7. Agora Furniture Group with accessible table, bench with backrest and bench without backrest (x2)
8. PECS Communication Board
9. Percussion Music Panel
10. Mirage seat with harness to be fitted to existing swing

Notes:

- Installation of play equipment is subject to normal ground conditions
- All trees are to be retained
- We have made provision for drainage stone as well as our normal Clause 804 Stone to all new safety surface areas in our quotation. As much as possible, we are hoping to use existing grass in grass circulation areas. All existing equipment to be retained will be sanded and varnished
- We have proposed loosefill woodfibre safety surfacing, rubber mulch safety surface and a small amount of safagrass matting as a wearing course on senior equipment on grass. Rubber mulch safety surfacing will be installed in high wear zones also.
- We will move one line if the existing fence and provide additional new fencing to match existing to fully enclose perimeter of extended playground.
- All works outside playground perimeter fencing by others
