1	7021404		Double Yellow Lines	NEW IRELAND ROAD (SC)	Dublin 8	DYLS need to be extended from the lampost to the gate on one side of the road only.	Not Recommended	SR not recommended - Following the assessment carried out by the Traffic Advisory Group Area Engineer it was recommended not to extend the Double Yellow Lines on the southern side of New Ireland Road at the junction of Herberton Road . After several site visits it was determined that the newly reinstated Double Yellow Lines were having a positive effect on traffic flow and no further interventions are needed.	Member of the Public	01/07/2021	0
2	7022591		Double Yellow Lines	SAINT JOHN'S STREET (SC)	Dublin 8	access required entering and exiting St. Michael's Terrace in a safe manner.	Recommended	Following the assessment carried out by the Traffic Advisory Group Area Engineer it was recommended to install Double Yellow Lines along the gable wall of number 10 St John's street.Stat – Install Double Yellow Lines along the full length of the gable wall of number 10 St John's street,	TD	10/09/2021	1
3	7023326		One-Way System	BENMADIGAN ROAD (SC)	Dublin 12	to make the green essentially a roundabout.	Not Recommended	Following the assessment carried out by the Traffic Advisory Group Area Engineer it was recommended not to introduce a one way system around Benmadigan Road. The introduction of such a large scheme will increase vehicle speeds on this road. The current arrangement of vehicles driving on both sides combined with the fact cars are parked on the carriageway act as an additional traffic calming measure along with the ramps that are currently in situ and thereby limiting vehicular speeds.	Member of the Public	21/10/2021	3
4	7025358		Yellow Box	REUBEN WALK (SC)	Dublin 8	For emergency access	Not Recommended	Following the assessment carried out by the Traffic Advisory Group Area Engineer it was recommended not to install a yellow box at this location. This area isn't a vehicular entrance and isn't a traffic junction either. A yellow box is used to prevent the blocking of junctions. The criteria for the provision of a yellow box are that the side road traffic flows should be significant and that the side road should serve a major traffic generating facility or a minimum of 50 residential units. Install Bus Stop Markings, RRM 030 on the south side of Victoria Quay, starting approximately 7.3 metres east of Public Lamp Standard No. 104, Extending east by Approximately 40 metres.	Internal	30/03/2022	0
11	7025722		Traffic Calming	EMMET ROAD (SC)	Dublin 8	speed bump to slow cars down.	Not Recommended	Following the assessment carried out by the Traffic Advisory Group Area Engineer it was not recommended to install a ramp on Spa Road at the junction of Emmet Road as this type of traffic calming is normally used in urban areas to indicate the start of a traffic calming scheme often where drivers turn off a major road into a minor side road. This junction is the exit point of a One Way Street and therefore wouldn't be suitable .	Member of the Public	30/03/2022	0
12	7025723		Bus Stop Marking	USHER'S QUAY (SC)	Dublin 8	As part of BusConnects C Spine: Bus Stop Markings and associated signage and road markings.
