Chancery Street

Street Tree Planting Proposals – November 23

Dublin City Council is looking to install a number of on-street tree pits on Chancery Street, Dublin 1. The proposed greening intervention will consist of 5 no. tree pit build-outs in the carriageway. They have been designed based on site constraints to provide the best layout for the overall street/local resident and to provide the best growing conditions for the trees. The tree pits will be finished with a raised granite surround, chestnut pale fencing, a feature tree and herbaceous underplanting

The position of the trees are based on the following;

- Location of Services
- Parking Provision
- Street architectural character
- Road Safety

N.E.I.C. Street Tree Planting

Thank you to all who attended and provided feedback to the recent consultations held in relation street greening in your area. We are now following up on recent consultations and getting in touch to provide an update on the North East Inner City Greening Strategy and tree planting initiatives that are possible for your street.

The revised drawings have taken into account all the feedback given to date.

Summer Street North
Portland Street North
Russell Street
Belvidere Avenue
Emmet Street

Portland Square will have an on-site meeting with the residents to discuss possible future improvements, as agreed during the public consultations.
Should the final plan receive approval, our aim is to commence the installation during the next planting season, between November 2023 and February 2024.
